

Smart Compact Payment Box

Smart wireless accounting

The compact, simple box with built-in MDB interface can be adapted to the user's requirements. The professional accounting interface, for example, can be fitted with a coin, chip, card or key module. The radio transmitter integrated in the payment system also makes wireless communication with the coffee machine possible. This requires the use of the Smart Connect* transmitter. The Payment Box is compatible with all Professional machines in the GIGA X and WE lines. Messages are shown on the coffee machine's display, while price and product management is performed on the computer.

*This is not supplied as standard.
